Data Patterns & Best Practices

JSON Storage Usage

- **Metadata:** Flexible assessment configurations
- **Public Data:** Account information and preferences

- **Achievements:** User accomplishment tracking
- **Features:** Plan capabilities and limitations

Temporal Data Management

- **created_at:** Standard timestamp for all entities
- **updated_at:** Track modifications (where applicable)
- **expires_at:** For time-limited entities (invitations, nonces)
- **completed_at:** For task/assessment completion tracking

Enum Types

- **user_role:** employee, manager, admin, owner
 - **employment_status:** full_time, part_time, contractor
 - **assessment_status:** draft, active, archived
 - **task_status:** pending, in_progress, completed, failed
 - **subscription_status:** active, canceled, past_due, trialing

Integration Recommendations

API Endpoints Structure

```
/api/v1/accounts/{account_id}/members  
/api/v1/assessments/{assessment_id}/evaluations  
/api/v1/activities/{activity_id}/tasks  
/api/v1/vision-boards/{board_id}/goals  
/api/v1/billing/customers/{customer_id}/subscriptions
```

Real-time Features

- Chat message notifications
- Assessment completion alerts
- Task status updates
- Vision board collaboration

Analytics Opportunities

- User engagement metrics
 - Assessment performance trends
 - Billing and subscription analytics
 - Learning path effectiveness
-

This updated analysis provides comprehensive example data structures for the mtzwzsbhlhulourliqvr Supabase project. Each table includes realistic sample data that demonstrates the schema relationships and data patterns used in the system.
